

CARING FOR LAND ALONG RIVERS

HOW SECURE IS YOUR BANK?

Most banks in the Rouge River system are failing!

Protect your assets... learn how by attending a workshop for riverfront landowners.

The Rouge River is suffering. Every time it rains, sediments and pollutants are washed into the river. This destroys habitat and clogs the gills of fish and sensitive insect larvae—resulting in their death.

This is alarming to all who live near the river. As a resident along the Rouge, we know you care about the river's health and enjoy the natural beauty and serenity the river provides. We need you to help us protect this wonderful natural resource that flows through your yard.

Don't get robbed! Save your property from erosion, protect water quality and maintain the value of your home.

Register to attend a workshop today!

- **September 24, 2015**

Summit on the Park, 46000 Summit Parkway, Canton

- **September 29, 2015**

Franklin Community Church, 26425 Wellington Road, Franklin
